# Mehdi Nourzadeh

*Software Engineer | Backend Engineer*

+98 930 342 1702 | mahdinoorzadeh1@gmail.com | Iran | Portfolio | GitHub

## PROFESSIONAL SUMMARY

Early-career Software/Backend Engineer with hands-on experience building REST APIs and backend services in Java/Spring Boot, C#/.NET, and Go. Experienced with multi-tenant APIs, legacy modernization, caching, persistence, automated testing, and CI/CD; also built a full-stack routing application and a security-focused desktop token manager.

## TECHNICAL SKILLS

Languages: Java, C#, Go (Golang), Python, JavaScript, TypeScript
Frameworks: Spring Boot, .NET, Node.js, Django REST Framework, React, Vue 3, Electron
Data & DevOps: PostgreSQL, MongoDB, Redis, SQL, Docker, Docker Compose, Jenkins, Git, GitHub Actions, Linux
Testing & API: REST APIs, JUnit, Mockito, Testcontainers, Postman, OpenAPI/Swagger, CI/CD

## WORK EXPERIENCE

Backend Developer (Contract) | Raastar — Oct 2025 – Dec 2025

- Delivered backend work across Go, Java/Spring Boot, and C#/.NET, including multi-tenant REST APIs and Java/MongoDB services.
- Adapted implementations to client requirements and coordinated delivery with cross-functional teams.

Backend Developer Intern | BaShomal — Mar 2025 – Aug 2025

- Analyzed and modernized legacy Java/Spring Boot services and configured Jenkins CI/CD pipelines.
- Integrated PostgreSQL persistence, reviewed code in GitLab, and contributed to Agile sprint delivery.

## SELECTED PROJECTS

**Spotter – Weather-Aware Truck Routing** — **Oct 2026**

Python, Django REST Framework, React, TypeScript, MapLibre

- Built a full-stack app that compares and ranks up to 3 routes using ETA-based weather checkpoints, load-sensitive risk rules, and travel time.
- Added a map-based risk view and 49 hourly heatmap frames for a 0–48 hour forecast slider.

**URL Shortener** — **Aug 2026**

Java 25, Spring Boot, PostgreSQL, Redis, Flyway, Docker, React, TypeScript

- Built a REST API and web dashboard for short-link creation, HTTP 302 redirects, expiration, and click statistics, with PostgreSQL persistence and Redis cache-aside redirects.
- Added API validation, OpenAPI documentation, health checks, Docker-based services, and GitHub Actions CI; tested backend and frontend workflows.

**CipherVault** — **Nov 2025**

Electron, Vue 3, Vuetify, Realm, AES-256-GCM, Keytar

- Developed a desktop API-token manager with AES-256-GCM encryption and OS-keyring master-key storage, supporting project/environment organization, CRUD operations, visibility and clipboard controls.
- Hardened Electron security with context isolation, restrictive renderer settings, Content Security Policy, and IPC sender validation.

## EDUCATION & CERTIFICATIONS

Associate Degree in Software Engineering | Imam Khomeini Vocational Institute, Aliabad, Iran — Oct 2021 – Sep 2025

CS50: Introduction to Computer Science | Harvard University — 2023

## LANGUAGES

Persian (Native) | English (Professional) | German (Limited)
